

Letter from Santa Claus

North Pole 2025

Dear Antony,

I hope this letter finds you well in the beautiful city of Paris. I've been keeping an eye on you from the North Pole and I'm thrilled to see that you've turned eight this year. Time flies, doesn't it?

I've heard that you love watching movies. That's wonderful! Movies can take us to magical places and teach us important lessons. I also know that you've been a good boy, taking care of your younger siblings. That's a big responsibility and I'm proud of you.

I've received your wish for a Lego set. Well, I've been working with my elves to make sure we have it ready for you. Remember, the magic of Christmas is not only in the gifts we receive but also in the love we share.

Merry Christmas,

Santa Claus
